

TruPhos Platinum

5-18-2 + Micronutrients

GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N)	5%
Available Phosphoric Acid (P ₂ O ₅)	18%
Soluble Potash (K ₂ O)	2%
Copper (Cu)	0.1%
Boron (B)	0.1%
Iron (Fe)	0.4%
Magnesium (Mg)	0.4%
Manganese (Mn)	0.04%
Molybdenum (Mo)	0.05%
Zinc (Zn)	0.8%

TruPhos Platinum is a high phosphate liquid fertilizer containing both NutriAg's TruPhos and CMM technology, along with a range of essential nutrients.

TruPhos Platinum is specially designed to stimulate plant vegetative growth and root production, as well as promote flower production and seed development. TruPhos Platinum also helps to overcome stress by supplying essential nutrients and stimulating root growth, which is essential in maintaining proper nutrition throughout the growing season.

Cell Metabolism Maximizer (CMM) Technology:

- Scientifically formulated to maximize key metabolic processes by enhancing the plant's own natural mechanisms to increase vigour and yield.
- Maintains optimal growth rates during key developmental stages
- Optimizes water and nutrient uptake for improved environmental stress tolerance
- Maximizes plant health leading to lowered disease susceptibility

TruPhos Technology:

- Contains Matrix Ortho-Deportonation (MOD) micronutrient sequestering technology
- TruPhos Platinum's unique chemistry allows the simultaneous inclusion and solubility of phosphates, magnesium and zinc which generally form insoluble solids in high phosphate solutions
- TruPhos technology allows for the addition of these extra nutrients while still maintaining a true solution

Orthophosphate versus Polyphosphate

Plants are only able to use phosphorous in the form of orthophosphate. Soil applied phosphorous can be converted from polyphosphate to orthophosphate and be utilized by the plant. Foliar applied phosphate must be already in the orthophosphate form to be used by the plant since there is opportunity for soil conversion of polyphosphate to orthophosphate. TruPhos Platinum contains 100% Orthophosphate making it readily available to the plant and able to elicit yield benefits almost immediately.

Features of TruPhos Platinum

- Safe and not phytotoxic
- Does not contain sodium or chlorides
- Liquid formulation is easy to mix and use
- Compatible with many products and pesticides
- Cost effective
- No harmful residues

Average Yield Advantage of 4.7 bu/ac

Average Yield Advantage of 6.4 bu/ac
